Climate-Smart Forestry

Record your notes about sustainable forest management and climate-smart forestry while watching the film Climate Smart Forestry.

1. How might forests be affected by climate change?

2. How can forests help combat climate change?

3. What strategies can forest managers use to help combat climate change?

4. How can producing forest products like timber and wood furniture help fight climate change?

5. What is one thing you would share with your friends and family about climate-smart forestry?

Career Corner

FORESTERS

manage forests for public and private use. They may develop short- and long-term plans for the forest. Their plans may include planting, growing, and monitoring trees for healthy growth and making sure forest practices meet environmental regulations.
