

Indigenous-led Solutions to Climate Change

QUICK QUIZ ANSWER SHEET

Question	Answer	Explanation
1	TRUE	Indigenous Peoples' traditional knowledge can provide insights on past climatic events, climate trends, and changes to ecosystems over time.
2	FALSE	Indigenous Peoples' territories transcend modern political boundaries between Canadian provinces and territories and even between Canada and the USA.
3	TRUE	Many Indigenous communities across Canada and several organisations are collaborating and working towards systemic change for a more equitable and sustainable future for all.
4	A	<p>Many Indigenous Peoples' voices and perspectives are left out of policy making due to oppressive government policies. In addition, many of them cannot afford climate adaptation strategies (e.g., high-quality air filters, air conditioning, relocation to less impacted areas).</p> <p>Climate change affects all regions of North America, including both coastal and inland, and rural and urban areas. Indigenous people have first-hand lived experience of the declining reliability of wild game, fish, and staple crops.</p>
5	D	They are all correct.
6	D	They are all correct. There are many ways to support Indigenous climate action.
